PROFESSIONAL SUMMARY

Enthusiastic and consistent self-taught frontend developer with a passion for building modern, responsive, and user-friendly web applications. Adaptable and solution-oriented, I enjoy tackling challenges independently before seeking support, and I thrive in collaborative problem-solving environments. Eager to grow with a dynamic team while delivering high-quality, impactful digital solutions.

SKILLS

Frontend: HTML5 | CSS3 | JavaScript | Tailwind CSS | Sass | Three.js | React.js | Next.js

Tools: Git | GitHub | GSAP

Backend / Databases: Supabase

EDUCATION

University of Calabar – BSc, Botany (2018–2022)

Certifications & Training

- The Complete JavaScript Course – Jonas Schmedtmann (Udemy)
 - The Ultimate React Course – Jonas Schmedtmann
 - Colt Steele's HTML & CSS Course
-

PROJECTS

Planner – React Frontend (07/2025 – 09/2025)

A neumorphic design React web application for tracking and organizing personal plans.

- Built with React, featuring custom hooks, Context API, Redux, and React Router.

- Managed server state with TanStack Query for smooth API interactions.
- Implemented a JSON server (hosted on Render) as a backend for persistent data.
- Designed a responsive UI with Styled Components for a modern user experience.

Eazy Mart – Vanilla Frontend (05/2025 – 09/2025)

An e-commerce web platform simulating the window shopping experience online.

- Developed using HTML, Tailwind CSS, and JavaScript.
 - Integrated dummy JSON server API data to persist cart and product information.
 - Designed a responsive, interactive UI with Tailwind CSS for cross-platform usability.
-
